Dear Paul,

As you requested I have enclosed a map of the area that we plan to open for new mining. Clint and I examined the map and Clint was sure that the area was closer to the now disturbed area than you and I had discussed.

We plan to reseed the already reclaimed areas this October and November and hope for moisture to help the growth of the areas that we have worked to reclaim and have released. We hope that everything that is being done is satisfactory to you and that we will find the right mixture of grass and have the right amount of moisture.

Thank you for your help to us and all you do to increase our knowledge of the claims, soil, seed and reclamation issues.

Sincerely,

Karen Palmer
